

Oral rehydration solution

15 February 2024

lipidless.com

Low-osmolatiry is strongly recommended for beginners.

Standard formulation (1 L)

3.5 g NaCl (salt)
2.9 g Trisodium citrate dihydrate
1.5 g KCl (NoSalt)
20.0 g Anhydrous glucose
27.9 g Total

Low-osmolarity formulation (1 L)

2.6 g NaCl (salt)
2.9 g Trisodium citrate dihydrate
1.5 g KCl (NoSalt)
13.5 g Anhydrous glucose
20.5 g Total

Prepare Dissolve all ingredients in 1/2 cup hot water. Then add cold water to fill to 1 Liter.

Substitutions I use “sodium citrate” and dextrose instead of glucose.
